

Lea Mouawad

Architect & Immersive Experience Designer

"Designing spaces that move — from kinetic architectural systems to immersive digital environments."

ABOUT

What does a space make us feel?

Born in Lebanon and based in Paris, Lea Mouawad creates environments that guide movement and emotional connection with space. Her practice spans architecture, interior design, immersive installations, and digital worlds — treating architecture not as static objects, but as **a narrative framework**.

Across kinetic roofs, adaptive facades, virtual cemeteries, and narrative-driven game levels, her work returns again and again to the same question: what does a space make us feel, and how can it move — physically, emotionally, and technologically — with the people who inhabit it?

"Architecture as a narrative framework, not a static object."

EDUCATION

Mastère Spécialisé® in Interactive Digital Experiences

Les Gobelins, Paris

Mention Excellent — With Distinction

Master of Architecture

Lebanese Academy of Fine Arts (ALBA), Beirut

Mention Très Bien — With High Honours

Architecture & Installation

Eight projects spanning civic infrastructure, cultural buildings, residential typologies, and speculative installations — built on parametric, kinetic, and adaptive design logics.

01

Neighbourhood Swimming Pool

01 / 08

Beirut, Lebanon — Civic Infrastructure

A kinetic roof composed of panels that shift and fold in programmed sequences, responding in real time to swimmers' movement and environmental conditions — turning a civic pool into a structure that breathes with its users.

Kinetic Architecture

Parametric Design

Civic Infrastructure

TOOLS

Rhino + Grasshopper

Design Museum

02 / 08

Beirut, Lebanon — Cultural Architecture

An adaptive facade of repositionable panels that reconfigure throughout the day in response to light, program, and season — a museum envelope designed to be read differently at every hour.

Cultural Architecture

Adaptive Facade

Museum Design

Primary School — USJ

03 / 08

Huvelin

Beirut, Lebanon — Education

A modular design of repeated, stacked classroom units, anchored by a pink corridor that bridges the university and the church next door — knitting a new school into an existing urban and institutional fabric.

Education

Modular Design

Urban Context

TOOLS

AutoCAD + Rhino + Keyshot

Multi-Comfort Residence

04 / 08

Dubai, UAE — Residential Urban Typology

A residential building that draws from the logic of the medina's urban fabric — generating shaded courtyards and a structural canopy that doubles as covered parking, reinterpreting traditional climate strategies for a contemporary tower typology.

Sustainable Design

Residential Typology

TOOLS

AutoCAD + 3ds Max + Keyshot

RUBIK

05 / 08

Conceptual Project — Parametric Systems

A parametric system built on the rotation logic of a Rubik's Cube: shifting one element changes the state of every connected element, generating an entire landscape from a single, simple spatial rule.

Parametric Design

Conceptual Architecture

Spatial Logic

TOOLS

3ds Max + Keyshot

ROOM

06 / 08

Digital Sculpture Series — Abhominable

A series of digital sculptures fusing geometric, architectural, and biological forms — exploring posthuman evolution through biotechnology, and the point where the built and the organic become indistinguishable.

Digital Sculpture

Posthumanism

Biotechnology

TOOLS

3ds Max + ZBrush + Keyshot

Landscape of the Dead

07 / 08

Installation — Virtual Cemetery

A virtual environment of parametrically generated tombstones, each displaying encoded data testimonies — a digital cemetery that memorializes not bodies, but information.

Data Architecture

Virtual Environment

Parametric Generation

TOOLS

Rhino + Photoshop

MeatMaker V

08 / 08

Zahle, Lebanon — Master's Thesis, Industrial / Agricultural Zone

An NGO manifesto project reimagining plant-based protein production through adaptive reuse and sustainability — featuring experimental tower organisms and industrial machinery systems, later evolving into "Meat Free Farm," a memorial to the industry it replaces.

NGO / Manifesto

Adaptive Reuse

Sustainability

TOOLS

Rhino + ZBrush + Unreal Engine + Photoshop

Game & Level Design

Three narrative-driven projects where architectural thinking becomes playable space — built in Unity and Blender, each shipped to itch.io.

02

Nour

01 / 03

Narrative Exploration Game — Lebanon, Eternal Night

Set in a Lebanon plunged into eternal night, the player guides the protagonist through forgotten ruins in search of her mother — a journey built from Lebanese cultural objects and architectural details drawn from the Baalbeck Temple.

Art Direction

3D Modelling

Level Design

TOOLS

Blender + Substance Painter + Unity

PLATFORM

itch.io

Chasing Goodbyes

02 / 03

Runner / Narrative Hybrid

A mother sprints along a train platform to say goodbye to her daughter before she leaves for university, following text-message clues her daughter sends along the way — a runner built entirely around one small, urgent emotional stakes.

Art Direction

3D Animation

Level Art

TOOLS

Unity + Blender

PLATFORM

itch.io

Roue Libre

03 / 03

Runner / City

A wheelchair-bound teenager races through the city at full speed to reach an athletics competition, weaving through a modular system of roads and urban assets built to keep the city feeling alive at speed.

Art Direction

3D Modelling

Level Art

TOOLS

Unity + Blender

PLATFORM

itch.io

CAPABILITIES

Skills & Technical Expertise

DESIGN PRACTICE

- Parametric & generative design systems
- Kinetic & adaptive architecture
- Cultural & narrative architecture
- Sustainable / adaptive reuse design

DIGITAL & INTERACTIVE

- 3D modelling & digital sculpture
- Game level design & art direction
- Virtual environment creation
- Data visualization & encoding
